## Report of the Executive Director May 2018 {submitted May 31, 2018}

- Start-up took place but there were some issues regarding the display monitor (which has been removed). The generator functions on diesel until the issues with the contractor are resolved.
- The Authority continues to monitor the sewers in low lying areas for cleaning & inspection.
- The Final NJPDES Permit has been received. The Authority has formally requested an ajudicatory hearing. Nothing further to report at this time.
- The challenge to the change in use fee is with legal. No action to report this month.
- Still awaiting the final report on Xchange flow data.
- SCADA: Engineer is continuing to negotiate to get the best option and cost for the Authority. No further action to report.
- Reported two sanitary sewer overflows at Harmon Cove to the NJDEP. They have scheduled an inspection for April 6, 2018. Had NJDEP inspection and am awaiting a report. The case manager indicated that this privately-owned collection requires a licensed operator, but we haven't received any notification of violation from NJDEP.
- The 2017 audit is on the agenda for the June 5<sup>th</sup> meeting..

- Sent Toscana Cheese a second notice of violation for excursions of pH values. This is for the violation notice of May 2<sup>nd</sup>.
- Awarded a contract to monitor the flow at PS#2 (Turnpike & Paterson Plank Road).
   Three monitors will be designated to record flow from Toscana, all of Windsor Drive & Dorigo Lane and at the pumping station.
- Met with the new EAP doctor. He will be on-site on June 13<sup>th</sup> to speak with all SMUA staff.
- Met with the NJHDG and discussed the need for the continued services of the Technical Advisor for the group. A resolution will be presented at the June 5<sup>th</sup> meeting.

#### SECAUCUS MUNICIPAL UTILTIES AUTHORITY ENGINEERS REPORT MAY 2018

The following is a list of the main activities as provided by this office to the Authority for the above-mentioned month:

- O Dual Fuel Generator. (This project narrative has been reduced, reference prior months reports for information) The piping has been completed and the two new regulators have been installed and pressure tested. The system has been turned on by PSEG. We are waiting for the technician from the manufacturer to arrive to balance the system for operation. Start up occurred and the system operated. The contractor still needs to return to install a new circuit board for the panel and a new low volt power transformer. A punch list is being developed and the contractor will need to complete the punch list to close out the project. The new circuit board did not solve the issue. We are waiting on the contractor to submit a solution. A notice is being sent to the contractor notifying them that if they jeopardize the grant funding, then will be held responsible.
- O Contacted Tax Department to ascertain new tax maps for use by the Authority for facilities inventory. Meeting never occurred. Beckmeyer Engineer has submitted a proposal to the SMUA for re-creating the Sanitary Sewer Map with updated sewer serving areas. This office will purchase the required utility layers and produce required maps. Recently received information form NJSEA and currently piecing the files together. Requested NJSEA to reformate material sent for compatibility to our software. Putting the files together on the Service Maps. Checking on proper manhole and pipe run locations. Work is continuing on map preparation. Received as-built Cad files on Exchange Place from McCutcheon surveyors and are incorporating them into maps. Additional information is required from the Seaview PS to the area of the Water Tower. A portion of this area was revised during the addition of the TP exit project. Plans are being updated when new or revised information is received.
- O Met with representatives for the proposed Hudson County Technical School to be located on New County Road. Produced estimated flow letter for the Authority and Applicant. Prepared technical review. Attended the force main pre-construction meeting. Went to site for connection into the SMUA system, however, the construction was postponed that day due to expectant inclement weather. The installation came upon an unknown water

- line. The engineer requested a change of their installation, the SMUA sent back an alternative that would put less burden on the SMUA. Went to site to observe installation, requesting as-built plans from contractor. As-built plans will be submitted by the contractor when surveyor performs final project as-built.
- O Started the SCADA project plans and specifications Continued the work on the specifications for this project. Bid documents will be ready for public advertisement and public pick-up on November 3, 2017 with a pre-bid meeting to be held on November 8, 2017. Bids will be publically opened on November 28, 2017. No bidders submitted. Therefore, the SMUA will need to re -advertise again for a bid opening in December for awarding at the January meeting. No one bid on the rebid, therefore, by NJ State law, the SMUA is allowed to negotiate a contract with a contractor. We have started the process with two contractors. We have met with both and will be receiving their proposals on February 15, 2018 at 10 am. We also traveled to Wallkill NY WWTP to look at a similar SCADA installation there. Negotiations were started and costs were delivered. Questions and clarifications are being sought from the Contractors concerning their proposals. We are constantly looking for new contractors whom may want to bid this project.
- O The SMUA has received a change of use at the old Cinelli recycling facility on Secaucus Rd. by Hudson County Motors. Requested additional drawings to review for change of flow charge. Site visit and spoke with an owner. The owner will be sending more information on oil/water separator and existing and proposed use areas. The owner just submitted the requested information, review to follow. The engineer's review was completed and distributed to the applicant. The applicant is challenging the increase flow connection costs.
- O Reviewed Koelle Blvd. Pump Station Panel "Motor Saver Module" for the possible replacement, upgrade or removal of same. Checking for redundancies within the systems. Contacting panel manufacturer representative for information
- O Checking on the specifications for approving a bid for 2 new check valves at the Henry Street Pump Station. Presently being installed.
- O Started plans and specifications for the replacement of certain sections of the Minnie Place sanitary sewer, on the north and south section from Pandolfi Ct. to go out for public bid. This is to repair the sewer before the Town paves the road this August. Met with 2 contractors to get quotes because it is not believed the cost will require public bidding.
- O Started researching for the replacement of the Odor Control Panels. Spoke with consultant familiar with this panel. Also, checked on an updated Ph/Ord transmitter, the existing one has failed and the model is not made any longer.
- O Started researching the possible cause of excessive foam in the Sludge Holding Tank.
- O Reviewing an invoice from the emergency contractor for work on two manhole frames and covers on Meadowlands Parkway.
